

Profile

About me

I completed my academic studies in the area of Business Economics. But some time later, I discovered that "IT", was what I always wanted! After years of experience in related fields, I started my requalification in the technological area. Today, I am a junior developer, with knowledge of front-end and back-end techniques. I like to work with a team, whose members like to share all their knowledge, without any fear and always with the goal of going further.
